SECURE PASSWORDS

Quick tips for creating and saving secure online passwords

#CybersecurityAwarenessMonth

ENABLE 'MFA'

Multi-Factor Authentication strengthens the verification process.

USE A MANAGER

Use a secure password manager such as BitWarden, Keepass or Dashlane.

DON'T USE PERSONAL INFORMATION

Avoid using birthdates or names from your loved ones.

MAKE IT UNIQUE

Make each password long, strong, and unique from your other passwords.

INCLUDE SPECIAL CHARACTERS

It significantly improves your password security.
